

PREPARED FOR Avadh Shukan Residency Bardoli, Surat, Gujarat	DATE 04 July, 2026	VALID UNTIL 04 August, 2026
---	-----------------------	--------------------------------

COVER NOTE

This proposal outlines the proposed Society Management System, project scope, modules, timeline, pricing, and support. The objective is to build a secure, scalable, and user-friendly web application that simplifies daily operations for residents and committee members.

PROJECT UNDERSTANDING

After understanding the day-to-day operations of Avadh Shukan Residency, it is evident that several administrative tasks are currently managed manually or through multiple communication channels. These processes can become time-consuming, difficult to track, and prone to errors as the society grows. The proposed Society Management System aims to centralize these operations into a single secure platform, improving efficiency, transparency, and communication for both residents and the management committee.

Existing Challenge	Proposed Solution
Maintenance payments are collected manually, making it difficult to track dues and payment history.	Online maintenance billing, payment tracking, and digital receipt generation.
Important announcements are shared through WhatsApp, where messages can be missed or lost.	Centralized Notice Board with categorized announcements accessible anytime.
Visitors are recorded in physical registers, making records difficult to search and verify.	Digital Visitor Management with quick entry, approval, and searchable history.
Residents submit complaints verbally or through phone calls, making follow-up difficult.	Online Complaint Portal with status tracking and resolution history.
Resident and flat information is maintained in	Centralized database with secure resident and

Excel sheets, increasing the risk of duplicate or outdated records.	Centralized database with secure resident and flat management.
Administrative approvals and daily operations require manual coordination among committee members.	Unified Admin Dashboard to manage approvals, reports, residents, notices, and society operations from one place.

SCOPE OF WORK

The proposed Society Management System will be developed as a secure, role-based web application consisting of multiple functional modules. Each module is designed to simplify day-to-day society operations, improve communication, and provide efficient management for administrators, committee members, security staff, and residents.

Module	Description / Features
Authentication	Secure login, role-based access, forgot password, password reset, session management.
Resident Management	Add, edit, view, and manage resident details, family members, contact information, and occupancy status.
Flat Management	Manage towers, floors, flats, ownership details, tenant allocation, and occupancy records.
Maintenance Management	Generate monthly maintenance bills, track payments, issue digital receipts, and view payment history.
Visitor Management	Register visitors, approve or reject entries, maintain visitor logs, and monitor entry/exit records.
Complaint Management	Residents can raise complaints, track status, assign complaints to staff, and record resolutions.
Notice Board	Publish important announcements, circulars, emergency notices, and downloadable documents for residents.
Staff Management (Optional)	Maintain records of security guards, housekeeping staff, electricians, plumbers, and other service personnel.
Admin Dashboard	Central dashboard displaying statistics, recent activities, pending complaints, maintenance status, and system reports.
User Profile	Update profile information, change password, manage contact details, and account settings.

USER ROLES

The Society Management System will implement a role-based access control (RBAC) mechanism to ensure that each user can access only the features relevant to their responsibilities. This improves security, simplifies navigation, and enables efficient management of society operations.

1. Society Admin: Responsible for managing all day-to-day operations of the society.

- Manage residents and flats
- Generate maintenance bills
- Verify maintenance payments
- Publish notices
- Manage complaints
- Approve visitor requests
- Manage staff records
- Generate reports and analytics
- Manage parking allocation
- Configure society information

2. Committee Members: Assist the Society Admin in managing society activities.

- View maintenance reports
- Review complaints
- Publish notices (if permitted)
- Approve events
- Monitor visitor records
- View resident information

- Access committee reports
- 3. Residents:** Access personal information and society services.
 - View maintenance bills
 - Make online payments
 - Download payment receipts
 - Raise and track complaints
 - View society notices
 - Register visitors (optional)
 - Book common amenities (optional)
 - Update profile information
- 4. Security Guard:** Manage visitor and gate activities.
 - Register visitors
 - Record delivery entries
 - Manage vehicle entries
 - Verify resident approvals
 - Maintain entry and exit logs
 - View visitor history
- 5. Maintenance Staff:** Handle maintenance-related tasks assigned by the management.
 - View assigned complaints
 - Update complaint status
 - Mark work as completed
 - Add service remarks
 - View assigned maintenance tasks

TECHNICAL FEATURES

✓ Secure Login	✓ Responsive Design
✓ Role Based Access	✓ Data Backup
✓ Maintenance Billing	✓ SSL Security
✓ Online Payment Integration	✓ Export Reports
✓ PDF Receipt Generation	✓ REST API
✓ Email Notifications	✓ Cloud Deployment
✓ WhatsApp Notifications	✓ Mongo DB Database
✓ Complaint Tracking	✓ JWT Authentication

✔ Visitor QR Code	✔ Password Encryption
✔ Search & Filters	✔ Dashboard Analytics

TECHNOLOGY STACK

Layer	Technology
Frontend	React.js + Vite
Backend	Node.js
Framework	Express.js
Database	MongoDB
Authentication	JWT
File Storage	Cloud / Ordinary
Payments	Razorpay
Email	Resend Email
Hosting	Render / VPS
Version Control	Github

DEVELOPMENT TIMELINE

Phase	Duration
Requirement Analysis	3 Days
UI/UX Design	4 Days
Database Design	2 Days
Backend APIs	8 Days
Frontend Development	10 Days
Testing	4 Days
Deployment	2 Days
Training & Handover	2 Days

Estimated Timeline: **35 - 40 Days**

Note: The above timeline is an estimate and may vary depending on the timely availability of content (photos, videos, bio, etc.), revision requests, or additional feature requirements.

PRICING BREAKDOWN

Module	Details	Amount (₹)
UI/UX Design	Responsive design for all dashboards and modules	2500 - 4000
Authentication & User Roles	Login, Role-Based Access, Password Management	2000
Resident & Flat Management	Resident records, flat allocation, occupancy management	3500 - 3800
Maintenance Management	Bill generation, payment tracking, receipts	4500 - 5000
Visitor & Complaint Management	Visitor approval, complaint portal, status tracking	3750 - 4000
Notice Board & Event Management	Notices, announcements, event updates	2000 - 2200
Admin Dashboard & Reports	Dashboard, analytics, reports	2600 - 3000
Testing, Deployment & Training	Testing, deployment, handover, basic training	2000
Total Estimated Cost		22,850 - 26,000

Note: The above pricing is an approximate estimate based on current market rates and the proposed scope of work. The final project cost may vary depending on specific requirements, additional features, revisions, or changes requested during development.

DELIVERABLES

- Fully Functional Society Management System
- Responsive Web Application
- Admin Dashboard
- Secure Role-Based Authentication
- Project Deployment
- User Training & Handover
- Project Documentation / User Guide
- Bug Support (6 Months)

PAYMENT TERMS

Milestone	Payment Amount	When
Advance	30% of the finalized amount	Before work begins
After UI Approval	15% of the final amount	After the finalization of UI Design
Final Delivery	Remaining amount	Within 15 - 20 days after project handover

CLIENT RESPONSIBILITIES

- Society Logo
- Resident List
- Flat Details
- Committee Details
- Maintenance Structure
- Notice Templates
- Payment Gateway Credentials (if applicable)
- Domain & Hosting (or authorize you to arrange them)

TERMS & CONDITIONS

1. Proposal valid for 30 days.
2. Scope limited to listed modules.
3. Additional modules billed separately.
4. Bug-fix support included for a defined period (6 months).
5. Hosting, domain, payment gateway, SMS, and third-party service charges are separate unless included.
6. Timeline starts after advance payment and required data is provided.
7. You may showcase the project in your portfolio unless requested otherwise.

Let's build a smarter and more efficient community together.

I look forward to collaborating with Avadh Shukan Residency Society to develop a secure, scalable, and user-friendly Society Management System that streamlines operations, improves communication, and enhances the experience for residents and administrators alike.

Warm Regards
